SUMMARY

Software Engineering (Honours) graduate from UTS with production experience building and deploying full-stack applications, REST APIs, and automated data pipelines. Comfortable across the full development lifecycle — from schema design and API architecture through to CI/CD deployment and QA. Proven ability to deliver in Agile team environments and independently ship live, scalable products.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, SQL, Next.js, React, Node.js, Tailwind CSS

Backend & Data: PostgreSQL, Prisma ORM, REST APIs, React Query, Recharts

DevOps & Tooling: Git/GitHub, Vercel, Railway, Postman, Agile/Scrum, SDLC

Cloud: AWS (Certified Cloud Practitioner in progress), Amazon SageMaker

EXPERIENCE

Evaheld | *Software Engineering Intern*

Nov 2022 – Apr 2023

- Built and integrated REST API-connected features including a Stripe payment gateway, enabling secure transactional flows for production users.
- Contributed to feature delivery within Agile sprint cycles; completed 100+ QA and usability tests and produced 20+ defect reports to improve system quality.
- Improved frontend performance by 20 Lighthouse points through asset optimisation and layout restructuring.
- Used Git/GitHub for version-controlled development, collaborating on feature branches and resolving merge conflicts across the team codebase.

Colossal Bet | *Data Analyst Intern*

May 2025 – Oct 2025

- Built and maintained 10+ SQL scripts to automate daily transaction reporting, reducing manual processing by ~4 hours per week.
- Developed 2 Tableau dashboards surfacing weekly KPIs across thousands of daily records, improving visibility for business stakeholders.

Optus | *Retail Associate (Casual)*

Jan 2024 – Present

- Ranked #1 for in-store sales for 6 consecutive months, exceeding targets across mobile and NBN.
- Maintained 95% monthly NPS, resolving customer issues and delivering consistently high service quality.

PROJECTS

AnalyzeBets — Live Sports Odds Analytics Platform

2025 – Present

Next.js · TypeScript · PostgreSQL · Prisma ORM · Vercel · The Odds API · Recharts

- Designed and built a fully deployed data product ingesting real-time odds from 11+ bookmakers across 6 sports every hour via automated Vercel cron jobs.
- Engineered a PostgreSQL schema for time-series storage; refactored batch inserts via Prisma createMany() reducing save time from ~2 minutes to under 5 seconds.
- Built RESTful API routes in Next.js separating data ingestion, storage, and presentation — mirroring microservices architecture principles.
- Rendered time-series line movement charts via Recharts, visualising bookmaker price shifts 24–72 hours before kick-off.
- Live:** odds-dashboard-iota.vercel.app

Dev.to Clone — Full-Stack Blogging Platform

2024

Next.js · TypeScript · Prisma · PostgreSQL · NextAuth · Vercel

- Built a full-stack content platform with Google OAuth, user profiles, and CRUD post management.
- Designed relational PostgreSQL schema; implemented infinite scroll with React Query caching to optimise feed performance.

EDUCATION

University of Technology Sydney (UTS)

Bachelor of Software Engineering (Honours)

Mar 2020 – Aug 2023

Relevant coursework: Software Architecture, Agile Development, Database Systems, Distributed Systems, Software Quality & Testing

LEADERSHIP & UNIVERSITY EXPERIENCE

UTS Women in Engineering & IT | *Front-End Developer*

Mar 2022 – Jun 2022

- Designed 2 dashboard UI concepts and delivered responsive layouts; facilitated weekly Agile stand-ups with stakeholders to track sprint progress and delivery.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner (CLF-C02) — In Progress
- Top 10% — AWS DeepRacer Student League, tuning reward functions using Amazon SageMaker
- LinkedIn Learning: Generative AI Fundamentals (2026)
