Summary

Software Engineering graduate with a background in Full-Stack development and Data Analytics. Strong in API integration, database design, and performance optimisation, and SQL- driven automation.

Technical Skills

TypeScript | JavaScript | React | Next.js | Tailwind CSS | React Query | Node.js | REST APIs | NextAuth | Prisma | PostgreSQL | React Native (Expo) | Git/GitHub | Vercel | Railway | Postman | Power BI | Tableau

Experience

Colossal Bet | Data Analyst Intern

May 2025 – Oct 2025

- Developed and maintained 10+ SQL scripts to automate daily betting transaction reports reducing manual processing time by ~4 hours per week.
- Built 2 interactive Tableau dashboards to track weekly wagering KPIs, enabling clear visibility into user activity across thousands of daily bets.
- Performed user segmentation analysis to classify active vs inactive bettors, supporting targeted email campaigns to re-engage lapsed users.

Evaheld | Software Engineering Intern

Nov 2022 – Apr 2023

- Built and launched homepage + contact page, reducing UI inconsistencies by 30%.
- Completed 100+ QA/usability tests and produced 20+ reports highlighting UX/navigation issues.
- Increased Lighthouse performance score by 20 points through asset and layout optimization.
- Implemented Stripe payment forms enabling safe online payments for future users.

Optus | Retail Associate Casual

Jan 2024 – present

- Ranked #1 for in-store sales consistently for 6 months, exceeding targets across mobile, and NBN.
- Maintained 95% monthly NPS and 90% 12-month average, resolving customer issues.

Projects

Dev.to Clone

2024

- **Tech Stack:** Next.js, TypeScript, Tailwind CSS, React Query, NextAuth, Prisma, PostgreSQL, Vercel
- Built a full-stack blogging platform with Google OAuth, profiles, and CRUD posts.
- Designed a relational PostgreSQL schema and implemented secure data operations using Prisma.
- Implemented infinite scroll feed + caching to reduce repeat loading and improve UX speed.

Lamp (IoT App)

2025

- **Tech Stack:** React Native (Expo), LIFX API, Node.js
- Implemented device pairing logic to synchronise dual IoT lamps via LIFX API.
- Build real-time remote light control functionality across devices.
- Developed secure API request handling for multi-device state management.

Education

University of Technology Sydney (UTS)

Bachelor of Software Engineering (Honours)

Mar 2020 – Aug 2023

Leadership/University Experience

UTS Women in Engineering & IT | Front-End Developer

Mar 2022 – Jun 2022

- Designed 2 dashboard UI concepts (Admin + Employee) and delivered responsive layouts.
- Collaborated with stakeholders and ran weekly stand-ups to track progress and ensure timely delivery.

Certifications & Achievements

- **Top 10% within AWS Deepracer Student League** tuning reward functions using Amazon SageMaker.
- **AWS Certified Cloud Practitioner (CLF-C02)** *In Progress*
